

## Mill Hay Helper

**A high fiber, low starch forage supplement.**

Hay Helper is a 1/2 " pellet intended to provide a supplemental source of digestible fiber when hay is not plentiful. Hay Helper can replace a portion of your horse's daily hay intake pound for pound, but should not account for more than 75% of the horse's daily diet.

The added alfalfa meal in Hay Helper contributes to its high degree of palatability. In situations where dust level is a concern, such as with horses' suffering from COPD, Hay Helper is an excellent choice as it is lower in dust than many traditional hays. Hay Helper is a low starch forage source that can provide consistently low levels of sugar and starch to horses' whose diet may need to contain limited amounts of those energy sources.

Hay Helper is manufactured in a large 1/2" diameter pellet form (similar to many horse treats). The size of this product makes it easy to feed, especially in situations where it may end up on the ground. The size also slows consumption, which can reduce digestive upset.

Hay Helper contains a balanced vitamin and mineral profile that increases the safety and efficacy of its use as a forage supplement. It is not intended to replace the grain in a horse's diet. It can be used to increase the fiber content of the grain portion of the diet, but should not be fed as the sole feed source. Since horse's needs vary based upon many factors, including size, breed, level of work, age, and metabolic rate, The Mill encourages you to consult with our Equine Nutritionist prior to making any major changes in your horse's diet.

NUTRIENT (As Fed Basis)	
CRUDE PROTEIN, % (min)	12.00
CRUDE FAT, % (min)	2.00
CRUDE FIBER, % (max)	35.00
CALCIUM, % (min)	0.30
PHOSPHORUS, % (min)	0.30
COPPER, ppm (min)	15
ZINC, ppm (min)	50
SELENIUM, ppm (min)	0.20
VITAMIN A, IU/lb (min)	2000
VITAMIN E, IU/lb (min)	50

**Ingredients:** Roughage products, processed grain by-products, calcium carbonate, magnesium oxide, zinc oxide, manganous oxide, copper sulfate, ethylenediamine dihydriodide, cobalt carbonate, sodium selenite, vitamin A acetate, vitamin D3 supplement, vitamin E supplement, menadione sodium bisulfite complex (source of vitamin K activity), thiamin mononitrate, riboflavin supplement, niacin supplement, pyridoxine hydrochloride, choline chloride, folic acid, d-calcium pantothenate, and vitamin B12 supplement.

**Feeding Instructions:** Feed 1/2 to 2 pounds per 100 pounds body weight per day. Feeding levels vary with the quality and availability of forage (hay/pasture). Seasons and the general condition of the horse will also affect daily feed allowances. Detailed feeding suggestions are available upon request.
